

Musings on Epsilon

I.

Epsilon's so proud to be
Full of positivity.
You can never be a hero
If you are born left of zero.

II.

You give me any epsilon
And I'll find you a delta.
I've got a winning strategy
Because of continuity.

III.

If every little epsilon
Gives rise to little delta,
Then continuity upon
The given point I grant ya.

If in your reckoning I spot
The epsilon and then some,
The continuity is not
Proved uniform in factum.
